

A complete filtration and dosing solution

- A soft and controlled filtration.
- Control of flow rates , temperatures and pressures.
- Clogging control.
- Linear proportional dosing (peristaltic pump) of gum arabic controlled by IFS BRC validated flow meter.
- Optimized regeneration rates.
- Validation and traceability of sterilization cycles.
- 3A and EHEDG guaranteed clamp mount sensors (quick to remove for inspection and calibration).
- A communication on network: report on production , washing , history of the wine flows by carter , water flow.
- Display of instantaneous flows.
